VENUS
made in sweden

Outstanding height option allows the use of the table in standing position

Venus' height possibilities (from 61 cm to 127 cm) are uniquely designed to cope with a wide range of needs and situations.

Venus Specifications

Type	Two column wheelchair-friendly electrically-elevating table
Max height	127 cm
Min height	61 cm
Movement speed	38 mm per second
Table weight	40 kg
Maximum load	142 kg
Power supply	220 Volt a.c.
Power outlets	2 X 220 Volt

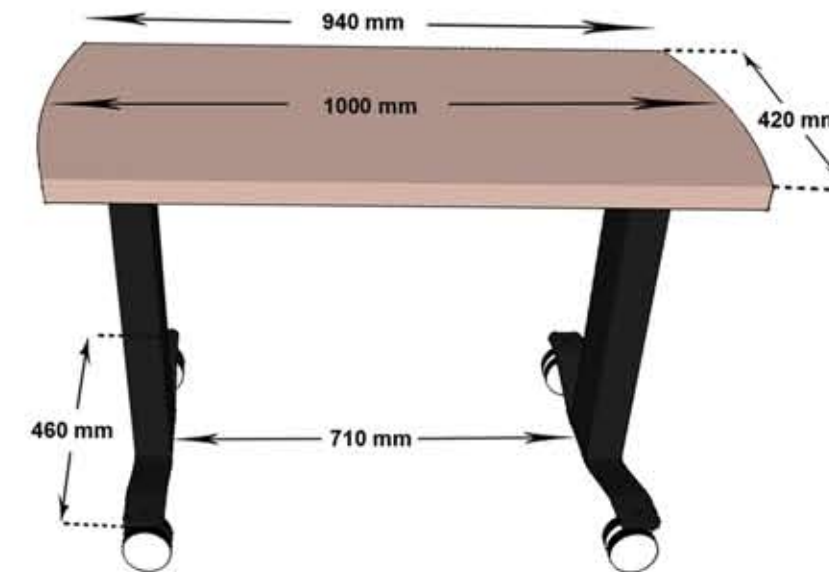

Improved table-top design

The table-top design embeds all the beams and cables to offer a clear and clean leg area under the table-top.

Heavy-duty wheels

Venus uses ball-bearing lockable wheels for durability and stability of the table at all heights.

Unique features

- Mechanically inbuilt anti-collision mechanism for upwards as well as downwards motion (for example to protect the knees during downward motion)
- PVC - free for environmental protection.
- Maximum height of 127 cm ensures that the table can be used in standing mode also. Ideal for situations where sitting down is not possible.
- Invisible gliding pads for optimised design.
- Low pleasant noise level.
- Synchronous drive of the middle profile.

Options

Table-top material: Pure Birch or Laminate.

Table-top colours: Standard (Birch Wood or White Laminate). Other options are available.

Column colours: Standard (Black). White & Grey columns are also available.

Table-top shape: The shape of the table-top is fully customisable to fit all needs.
